Title: Life inside the fence

[Intro line]

4 key numbers to show

1. [Heading: Which parks hold the most wildlife?]
[Note: Name the richest and poorest park. Explain "species recorded"]

Map
species by park

Scatter
size vs species

[Annotations: Explain the trend line.]

2. [Heading: Who lives where?]
[Note: Introduce the four animal groups. Point out one park that is strong birds, but weak in mammals.]

Map
by animal group

Heatmap
group mix

Map
pick animal

[Invite users to pick an animal and see which parks it turns up in]

3. [Heading: Why protected areas matter]
[Note: Explain "threatened": Critically Endangered, Endangered, Vulnerable, Mention that parks give these animals safe habitat.]

Waffle chart
threaten animals in these parks

Lollipop chart
most seen threatened animals

Parallel
5 measures comparing parks

[Annotation: which park does best on several measures and which stands out for threatened species.]

4. [Heading: When do visitors see wildlife?]
[Note: Say who logs sightings and what that means for reading the charts.]

Heatmap
month by park

Streamgraph
sightings by year
